## ANSWER THE ALARM!

Norway People Should not Delay. If your kidneys are inflamed, Don't stand around and do nothing. Like a fire it will soon be beyond control.

You will get the alarm in time—Backache, or dizziness or disorders of the urine.

Heed the warning. Give your kidneys a rest by living more carefully.

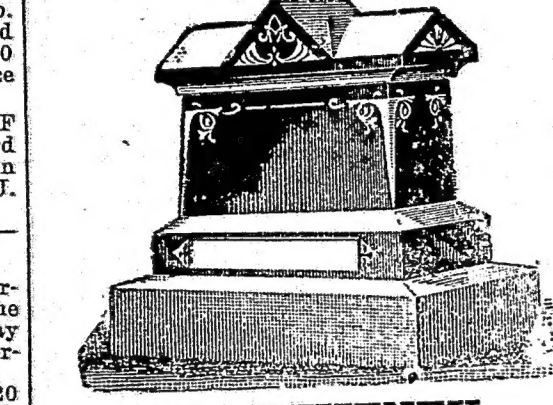

Use Doan's Kidney Pills to help stamp out the cause.

Profit by a Norway woman's experience.

Mrs. Myrtle Payne, Hazen St., Norway, says: "A few years ago I was having pains across my back and kidneys. They annoyed me very much and on stooping or lifting I felt them more. I found Doan's Kidney Pills very good for this trouble. As I used them, the pains gradually lessened. Soon I was practically free from the trouble. I feel that Doan's Kidney Pills are entirely worthy of my recommendation."

## PATRIOTIC

They were talking war in the White House And at last they made it go. They are making big preparations To quell a foreign foe.

They are recruiting the army and navy To every possible land. Who is of red American blood To serve his Uncle Sam.

They are mustering in the National Guards From many of the different states; And the boys are going with a good free will And burning with German hate.

And many a lad in khaki Is waiting his turn to go. To defend the dear old land From the clutch of an alien foe.

And Company D of Norway, The crack regiment of Maine, And the call came not in vain. They were mustered out at Norway To serve their Uncle Sam.

And every man is on his guard To do the best he can. Their knapsacks slung upon their backs, They march to fight the foe.

A squad of daring Yankees For sure against that they are. They board the train at Paris Singing out to war we go, rides With their U. S. flags flying high.

They are filled with the Yankee spirit, The spirit of '76, the spirit of '98. The Massachusetts fighting sixth Was the first regiment to entrain, They were out to die for Uncle Sam.

But not to die in vain! And his lads are full of fun; But when duty calls these lads They are the men behind the guns.

Now the dear old Stars and Stripes Proudly float from shore to shore, And our boys in khaki and the boys in blue Will see her float forever more.

Robert D. Churchill. West Paris, Me.

ings in our new body plant. We spend 24 per cent. more on beauty than last year.

But the greatest Mitchell extra is this double strength in every vital part. Our margins of safety—once 50 per cent.—have been doubled in three years.

Over 440 parts are built of toughened steel. All safety parts are vastly oversized. All parts which get a major strain are built of Chromo-anadium.

The object is a lifetime car, and tests show that we have it. Cars still in good condition have been run over 200,000 miles.

### Cost \$4,000,000

The Mitchell extras on this year's output will cost us \$4,000,000. They cost you nothing, because our factory methods save them.

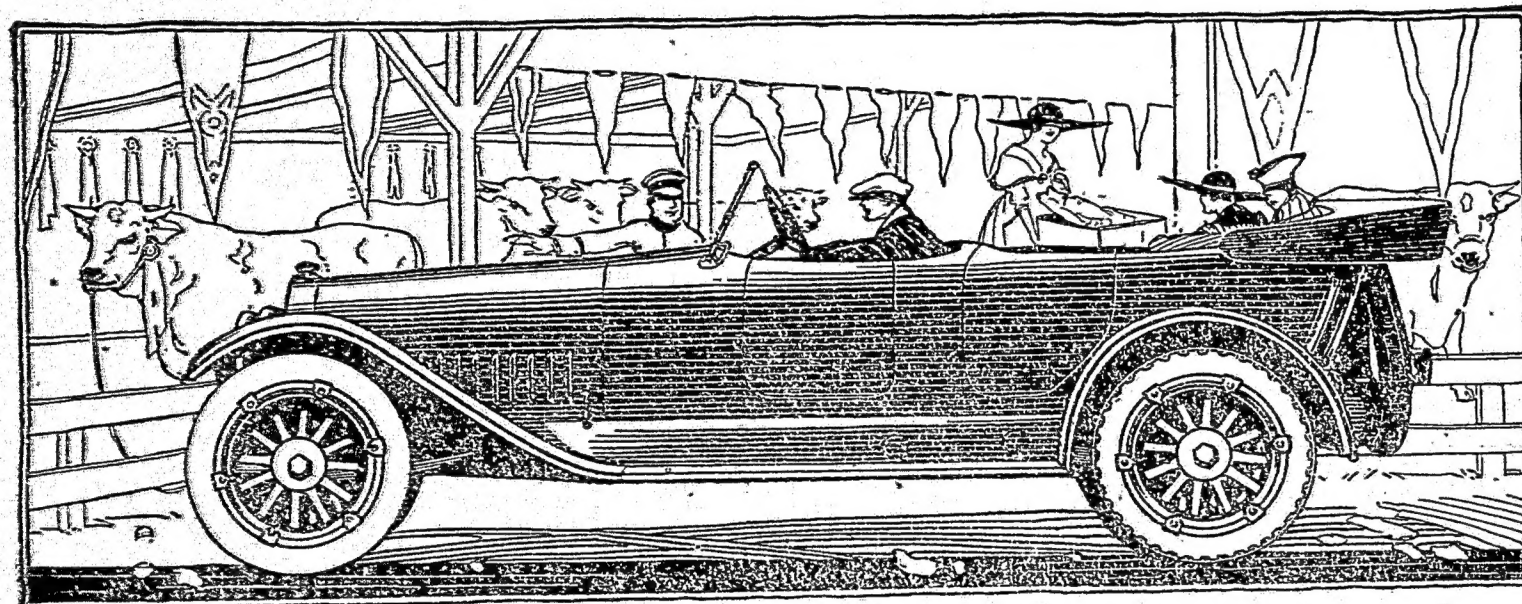

Compare the Mitchell with cars without these extras. We will abide by your judgment on which car you want.

Daisy Baker's Mother Says

**Which Do You Choose  
to Pay for the Food You  
Eat—\$1.40 or \$17.20?**

Scientific analysis by the U. S. Department of Agriculture proves that there is as much actual food value in 2 1/2 lbs. of flour as in 43 dozen eggs.

At 40 cents a dozen, the eggs cost \$17.20, while, even at \$11.00 a barrel, a 2 1/2-lb. sack of William Tell Flour will cost you only about \$1.40.

Of course, you don't want to eat all flour nor all eggs, but you can readily see the great possibilities for economy in flour.

uring out more ways to use flour to take the place of more expensive foods.

William Tell Flour is one of the easiest flours that I have ever used. It's made in Ohio—right in the Miami Valley, where the rich limestone soil gives it a most delicious flavor and wonderful baking qualities.

It takes the ache out of bake and puts the flavor in. I use it for everything.

**Use WILLIAM TELL Flour**

It is guaranteed by the grocer who sells it, by the Antioch & Burk Company, who make it, and by the Ohio Better Flour Label, which you'll find on every sack.

## 5,000,000 Corns Lifted Right Off!

### Try 2 Drops of Magic "Gets-It"

There's wonderful difference between getting rid of a corn now and the way they used to try to get rid of it only five years ago. "Gets-It" has revolutionized corn history. It's the only corn remedy

"See! Just 2 Drops of 'Gets-It' Now Tomorrow You'll Feel That Corn Right Off—and It's Gone!"

today that acts on the new principle, not only of shoving up the corn, but of loosening the corn off so loose that you can lift it right off with your fingers. Put 2 drops of "Gets-It" on that corn or callus tonight. That's all. The corn is doomed sure to sunrise. No pain, or trouble, or soreness. You do away once and for all with toe-bundling bandages, toe-eating salves and irresponsible what-nots. Try it—get surprised and lose a corn.

"Gets-It" is sold everywhere, 25c a bottle, or sent on receipt of price by E. Lawrence & Co., Chicago, Ill.

Sold in Norway and recommended as the world's best corn remedy by F. P. Stone, Frank Kimball and the A. L. Clark Drug Co.

## This Spring

What You Get for  
What You Pay.

In the clothing field, as in every other, there are certain prices at which one's money brings the greatest possible return.

To pay less is unwise—you sacrifice quality in some form or other. But sacrifice you do—whether it be in appearance, fit, quality or comfort, lowness of price has cost you desirable quality.

To pay more is foolish—for beyond the true "value price" lies extravagance. What, then, is the value price, who determines it and how? Answer these queries and you have answered the question of "what suit to buy."

Now value is simply a matter of what you get for what you pay—it is determined by the ratio of quality to price. The true "value price" is that at which you get the most for your money, in those qualities that are essential to your permanent clothes satisfaction.

Clothes from the House of KUPPENHEIMER are the kind with perfect fit, style and fabrics. And above all, Guaranteed Satisfaction. Come in and look them over.

## NORWAY AND VICINITY.

**Browning Club's Last Meeting.**  
Mrs. Elizabeth Bicknell entertained the Browning Reading Club at their last meeting for the season Monday evening. The regular schedule was followed and a program given by Mrs. March substituted. After roll call, "My Most Economical Recipe," Mrs. Miriam Bruce and Lena Andrews read selected articles on Domestic Science. Two dollars was voted for Red Cross work.

The annual business meeting followed and the following committees were appointed: Program Committee, Elsie Swan, Jennie Baker, Charlotte Lovejoy; Nominating Committee, Mrs. Eva Kimball, Mrs. Thera Lovejoy; Picnic Committee, Mrs. Linnie Bartlett, Mrs. Gertrude Libby, Mrs. Lena French. Memorial services for deceased members will be held June 20 at the home of Mrs. Edith Bartlett with a fitting program. The decorating committee, Mrs. Elizabeth Bicknell, Elsie Faver, Mrs. Gertrude Libby and Mrs. Eva Kimball will arrange for appropriate cemetery memorials. No more regular meetings will be held until October.

**Till the Soil be Happy and Useful.**  
Frank H. Richardson, insurance agent and barber has become a farmer. He has arranged for the land on the Capt. Whitmarsh place and with Mrs. Lizette Sampson, it is to be planted with beans, potatoes and garden sals. Frank has bought the seed beans for 25 cents a quart of Sim Yeaton and got a bargain he says.

In company with Herman Richardson he bought two pigs of Harry Jackson paying \$5.00 each and has built a pigery. He got second hand lumber of F. H. Beck, automobile king and post-office building magnate and is keeping expenses down. This is proper.

He also has eight hens and a rooster and during March each biddie netted him 24 cents each.

Richardson is prosperous and happy, others can do the same.

Till the soil do something.

The Boy Scouts, under the direction of Scout Master, Vivian Akers, enjoyed an out-of-doors dinner Friday night, at the Akers studio on Pleasant street.

Harry Lasselle had an interesting collection of photographs in Miss Libby's Cottage Studio window. These pictures were secured near the Mexican border last summer while serving in the 2nd Maine Regiment Band that enlisted from the Maine State College at Orono. Scenes about camp that included the band collectively and individual members in various situations. Burro riding and bath tub initiations were prominent. One postcard reproduced part of the funeral procession carrying the remains of Private Reuben Harding, Co. D, 2nd Maine, who was drowned in the Rio Grande, to the station. Army shells and cartridges gave the exhibit a true military aspect.

Norway Lodge No. 1614, Loyal Order of Moose will hold a regular meeting in Woodman's Hall Friday, May 4th. A large class of candidates is expected. Ice cream and cake will be served after the work.

Frank Jewell has taken out a guide's license for 1917. One day recently he came across a large adder about two feet long, up Pleasant street way, which is the first one noticed this spring.

Ice went out of Hobbs Pond, Saturday, April 28, and Lake Penesseewassee, April 29.

Work more, play less—economize.

It is said every man admires a pretty girl and the Norway military company is no exception.

With famine a grave possibility, there is no room in this town for the man who won't work. Pass on!

I am to plant a garden and if the pinch comes, shall kill the dog. This is patriotism. Watch me this summer!

Sell Foster says "I'm an economic cynic" because I don't buy his house and live on the hips of Highland Avenue.

The business man who advertises only when trade is brisk is close kin to the fellow who prays for rain during a deluge.

"I've got the girl to work in the house and now I want a man to work on the farm," thus said E. L. Hutchins. He advertised in your Intelligence Column.

Murch and the two girls, Fay and Dorothy, have spent two days cleaning up the linotype machines. Am afraid they got them so clean they will catch cold. The machines, I mean.

If I had my way, there would be no baseball this summer. The crowd keep no Saturday afternoon holiday unless it was to work on the land, but not then when there is work to be done in shop.

Wonder if the grangers will spend one day in fourteen in town eating picnic dinners and chewing the rag over the profits of the middle man. Some will, no doubt, but others won't. This year is the farmers' opportunity. Let them improve it.

Mothering 200 and more chickens in the house and patriotically spading up the garden is what one Orchard street woman is doing. I can forgive them if they do fly their flags wrong end of it. They are workers, all on the street are workers and producers.

There is one patriotic thing we can all do. That is to buy at home and keep our money in circulation at home as much as possible. And the local dealer can demonstrate his own patriotism by keeping his prices down as much as possible. Every little helps—both ways.

In these trying hours there may arise a few who will try to get rich quick at the expense of the nation and its people. But it will be neither profitable or wise for them to attempt anything of the kind. If we can live and help others to do the same, we should be satisfied.

Don't eat up your seeds! Mother has increased her stock by one more potato. I picked it up in the street and had not Harrison State Driver told the man who was passing that "Water glass" is a contrivance for them to attempt anything of the kind. If we can live and help others to do the same, we should be satisfied.

"Water glass, 3 cents." That is a mistake, it should have been 30 cents. We made the mistake and not Frank Stone. "Water glass" is a contrivance wherein you submerge 20 cent eggs in May and take them out in November and get 60 to 65 cents. It is a recent invention and adds much to the thrift of poor people and sick babies who demand fresh laid eggs along about Thanksgiving time.

A monster egg was given me by Mrs. A. M. Dunham. It is the biggest I ever saw. It measured 6 5/8 x 5 5/8 inches, and tipped the scales at 4 3/8 ounces.

It made a breakfast for mother and I and the dog. We had no potatoes, but some toasted whole wheat bread that was also furnished by Mrs. Dunham's son-in-law, Nate Noble, who has a mill and grinds wheat in the old fashioned way. He has two bushels of this wheat, but I understand he is to plant the most of it.

"Twenty-nine years ago," said A. A. Everett, the Water street trader, "I bought that house and have owned it ever since. At that time I published my freedom notice in your paper at an expense of \$1.50, as I was 15 of age then. Haven't lived here all the time, but away some, but I've kept the house and built this store some years ago, but trade now is awful dull, everything is so high and people are economizing." Here is another case where economy hurts, but it's necessary.

Re. buttermilk economy: I have received word that it has been advanced one cent more per quart and that none will be furnished unless I pay six cents. The excuse is ingeniously worded, viz.: that there is that amount of food value in buttermilk to feed to hogs. Have been patronizing Ernest Hutchins of the Seitz Farm and no doubt he has got a receipt for "Butter Values in Milk" from an Orono Demonstration Station or maybe he has joined the N. E. Milk Producers' Union. His price for buttermilk is six cents and subject to change without notice.

We may put it down as a self evident fact that if the people of this country persist, during the coming year, in living on the same extravagant scale of former years, we as a nation will strike the rocks.

Experts in the agricultural department have estimated that the actual waste of food in the United States is \$700,000,000 annually. This is in addition to the enormous consumption in excess of what is really needed to support life comfortably.

The International Institute of Agriculture sends this solemn warning from Rome: "The world's food crop is deficient and the situation is becoming alarming."

Now we are doing much talking as to the duty of raising big crops, of increasing our production in every way possible, which is perfectly right. But more than this is needed. We must act as well as talk.

Heretofore the United States has always had a safe surplus of foodstuffs from one harvest when the next was garnered. This very fact, possibly, has had more to do with fostering our extravagance than anything else. We have felt that our resources were boundless and that we could never come to want.

Now, however, that surplus has vanished, and in its place we have only gold, the most useless commodity in the world unless it can be exchanged for that which we need. "And at last we must wake up and face the fact that we are up against a food shortage, and gold cannot buy food nor will it feed us."

The solution of the food problem is up to every man, woman and child in the country. It is useless to mine words for fear of hurting some one's feelings—extravagance and waste must cease. It is useless to undertake to solace ourselves with the prospect of a large increase in production. That of itself will not relieve the situation if extravagance continues. All must exert themselves to produce, and all must exert themselves to save.

You, our farmer friend, because you have plenty and are raising plenty more, have no right to waste that plenty or to throw it away in needless extravagance. Others will need it, and it is their right that they should be able to get it.

You, Mr. Rich Man, just because you have plenty of money to pay for it, have no right to waste that which others need, and of which your extravagance will deprive them.

Let us not be deceived. It is up to each one—rich, poor, high or low—to conserve the food supply. Food waste this year will be nothing less than a crime, and should be so recognized and treated.

A few months ago, when gold was flowing into our coffers, in yellow streams we strutted and boasted of our boundless wealth. We compared ourselves to Midas—that everything we touched turned to gold. And now we are in grave danger of finding ourselves in the predicament—our gold is useless because we cannot eat it.

Economy in any line is praiseworthy, but economy in food products just now is the highest type of patriotism, and the most disloyal of all is the man or woman who wilfully wastes the nation's food.

Hugh Pendexter says, "Buttermilk economy" can be overdone and work an injury in this community. He flashes cautions, signals on my economy lectures and says, "work more, get bigger wages and send all you get. This will keep factories running and trade good." Maybe it is so.

While he was talking I had a pair of shoes under my arm that I was taking to a cobbler to be repaired. He no doubt, could advocate throwing them in the fire and buying a new pair so as to help the manufacture and shoe trade. But where is the leather coming from? Fourteen Lynn shops have shut down because they can't get leather and others are closing. Would you go bare foot? Well, it's all right for summer, but a little hard on winter loggers.

I contend the principle of "buttermilk economy" as laid down in last week's paper is correct for these perilous times. If everyone would practice it and fill the soil intelligently we'll win the war with Germany but not without struggle and privation.

Remember. Waste nothing. Traders and manufacturers must contribute and they are willing to.

Gifford Pinchot writes me a letter. He lives in Milford, Pike Co., Pa. He got my correct address, even to the initials. Just think of it!

This is the fellow who got a national reputation in a "conservation" fight with President Taft and Theodore Roosevelt. The fellow who got on the fire line in France and Gifford is stimulating the farmers and others to raise more food.

Here is what he says. Read it. Dear Mr. Sanborn: In this great time when every citizen must do his part, the President has made his clear appeal to the men who live on the land. He is right in doing so, for the safety of our country just now is in the hands of our farmers. What I mean is not merely our safety and the safety of our Allies in the matter of food. I mean that the safety of the United States against foreign invasion hangs in the balance in the hands of the farmers of the forty-eight States.

The two great weapons in this war are arms and starvation. The war against Germany must be won or lost in France—the war against starvation will be won or lost in America. The Kaiser cannot whip the Norway High school and English armies and the English navy while England has food. But it is still possible that the German submarines may be able to keep food enough from reaching England to starve her into submission.

If the submarines win, the first item in the Kaiser's terms of peace will be the English fleet. With the English fleet in his possession, the Kaiser will be master of the world.

What will happen to us then? Every man who stops to think knows the answer. We shall have no money, food, labor, land—everything that is desirable in the world except the power to protect what we have. Experts estimate that it will take nine months to get ready to meet a German army of even 150,000 men, with modern artillery. Under such circumstances, would the Germans treat us better than they have already treated Belgium and France?

Even if the armies of our Allies should crush the German military power this summer, before the shortage of food can reach the point of want, the world would still need vast quantities of American food. But if they do not only one course can make us safe, and that is to grow food enough on our farms for ourselves and our Allies, and to put ships enough on the sea to carry the food, in spite of the submarines, to the men who are fighting our fight.

If the war lasts beyond this summer, it will be the American farmer who will win or lose the war, who will overcome militarism and autocracy, or allow them to spread and control the world, ourselves included.

This is no fanciful picture, but sober fact. Many a man will make light of it until he comes to think it over, but I venture to say that few will be so lightly after careful thought. It is no more impossible than the great War itself appeared to be, only a few days before it began.

It is true that we can greatly increase the available food supply out of grain now used in making liquor, and by reducing household waste. But when these two things are done, and done thoroughly they will not be enough. The final decision will still rest in the hands of the men who raise our food in the first place. The clear duty of the Nation is to guarantee the farmers a fair price for their crops when grown, and a reasonable supply of labor at harvest. The clear duty of the farmer is to raise food enough to win this war for democracy against Kaiserism.

No such responsibility has ever rested on any class of men since the world began as rests today on the farmers of America.

## BROKEN DOWN IN HEALTH

Woman Tells How \$5 Worth of Pinkham's Compound Made Her Well.

Lima, Ohio.—"I was all broken down in health from a displacement. One of my lady friends came to see me and she advised me to commence taking Lydia E. Pinkham's Vegetable Compound and to use Lydia E. Pinkham's Sanative Wash. I began taking your remedies and took \$5.00 worth and in two months was a well woman and was able to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. If women wish to write to me I will be delighted to answer them."

I was a midwife for seven years and I recommended the Vegetable Compound to every woman to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. # H EATON'S HIGHLAND LINEN

Distinction is given to your attire as much in the making and those little touches of ornamentation as in the quality of the fabric you use. The quality of EATON'S HIGHLAND LINEN is unusually good for so moderately priced paper. Its numerous embellishments, and the fashionable envelopes in which it is enclosed, lift it above all other inexpensive writing papers. Its use will add distinction to your correspondence. Our book department is waiting to serve you. We stock all the popular novels and standard authors and can procure any other work in a few days.
